

Bible Curriculum, Kindergarten

Course Philosophy

The study of the Bible enables students to focus on the reasoning behind the faith decision they have made. It gives them a solid foundation in apologetics. Through Bible study, relationships with the Lord are strengthened and deepened. Students come to understand church history and are able to recognize the evidence that supports the accuracy of the Bible. Everything learned in Bible class should be one more step on a journey to an irrevocable decision to not only be a faithful believer in Christ but to be able to refute the arguments, philosophies, and methodologies of secular humanism and other major world religions. It is Bible study, leading to a relationship with the Lord Jesus Christ, that enables believers to become who God called them to be, worshippers empowered for a lifetime of faith and service.
